

Sharing our learning & playing activities

We talked about different homes & houses around the world. After discussion children decided they would like to build an Igloo...

We started our mission! We told children that an igloo is a type of hut made up of snow /ice in very cold places to stay warm and dry.

Parents helped us collect the milk bottle. Thank you. We also discussed the importance of recycling.

We learnt new words such as Eskimo, shelter, ice, arctic, dome, winter, snow and that it can melt slowly.

Together we decided that we have completed our own version of an igloo, everything looks safe and ready to use...

Mission accomplished! We enjoyed discovering and experiencing what it might feel like to live in an igloo!
